

Mobile visit reporting and customer information

Sales and account managers can now have their own web site. Whilst on the road they can enter visit reports, update their agenda, enter quotations or orders, get information about invoices and outstanding payments, sales order status, available stock, prices and technical documents.

SERA wins the Innovation Award

We received an Award for the innovation of the year, for our software and development of a local currency for the city of Alphen aan den Rijn. Even the city of Bristol (UK) with their Bristol Pound has shown interest in our software, with some very nice features, that are not available in the current application. Next month they will visit our office.

Server technology

SERA server works now on any platform from Windows server 2008 till 2012 R2. The installation can be carried out on location, but also as a cloud service.

The clients can be any computer from Apple to Windows 8. Several parts of the software are also available as native "app" both for Android and IOS.

SERA offers hosting (cloud) facilities to many of its customers. Beside backups that are made every 5 hours, we are also mirroring the data from the servers in our office on-line to a set of servers in another building. Both locations have a separate 500 Mbps internet connection.

Our consultants can help you to set up your own system with almost 100% security.

Strongest Link

SERA received the “Strongest Link” award for being the most customer focused company in the software industry in the Rhine area of Holland. From the jury report:

“A company with a strong vision to the future. They are thinking as if they are the customer and often the result exceeds the highest expectations”
